

L.H. Barkhausen Waterfowl Preserve's Outreach Environmental Education Programs

Barkhausen is excited to announce that we are offering off-site outreach programming at schools and other organizations throughout Brown County.

For outreach programs a time slot of approximately 1 – 1.5 hours. Programs can be adjusted to just about any age.

Outreach fee is \$100 with a 50 students max, unless otherwise stated.

To register please call our office at (920) 434-2824

Programs

Spring/Fall

Nature Trek -

Let's get our hike on! This fun program is based on discovering the world through use of our five senses.

Let's Get Birdy -

What makes a bird a bird? Students will learn unique adaptations birds share and learn basic birding skills through sight and sound.

Winter

Snowshoeing -

Students will learn about snowshoes on a winter adventure! Max of 25 participants*

Winter in the Forest -

Students will learn ways Wisconsin animals have adapted for the winter and how to identify tracks and scat on an interpretive hike.

Year Round

Live Animals, Furs & Skulls -

Students will interact with native Wisconsin animals both living and non-living, learn basic identification skills, and similarities and differences.

L.H. Barkhausen Waterfowl Preserve's
Off-Site Park Environmental Education Programs
For Schools and Other Organizations

Barkhausen is excited to announce that we are offering *off-site* programming at two different Brown County park locations each offering a unique natural space to learn.

For off-site programming a full-day trip is required. Programs are approximately 2 hours in length and can be adjusted to just about any age.

A full day program consists of two-2 hour programs \$4/students, \$100 minimum, and 50 students max, unless otherwise stated.

To register please call our office at (920) 434-2824

Two Locations

Both parks are equipped with an indoor shelter, playground, and bathrooms.

Neshota County Park

Address: 5757 Park Road
Denmark, WI 54208

Way-Morr County Park

Address: 3832 Park Road
Greenleaf, WI 54126

Programs

Spring/Fall

Water Study -

During this hands-on exploration students will be focusing on living and non-living parts of a water-based ecosystem while learn to identify creatures, water quality, lifecycles, and adaptations.
